### Job Description

The University at Buffalo is establishing a list of eligible candidates for the Plant Utilities Engineer 1 title. As a Plant Utilities Engineer 1, you would operate, maintain, troubleshoot, repair, test, and calibrate mechanical and electrical equipment providing heat, hot water, ventilation, air conditioning, and electrical distribution in a safe and efficient manner. You would make recommendations on major overhauls and replacement of equipment and identify, recommend and develop energy conservation projects. You may supervise subordinate staff in the operation and maintenance of heating facilities and mechanical equipment. You may also supervise contractors in an emergency or project situation and you may be required to assume responsibility for operations of the overall physical plant. Positions involve shift work within a 24-hour work schedule which includes night and holiday shifts.

The Plant Utilities Engineer 1 exam is now a decentralized, continuous exam. This application process replaces the traditional exam process.
