<b>Job Description</b>	

### Position Summary

The **Audiovisual Systems Programmer** plays a pivotal role in designing, implementing, and maintaining audiovisual systems, immersive content environments, and control solutions to enhance teaching and learning and collaboration experiences across our campus. This position collaborates with faculty, staff, technical teams, and campus partners to create sophisticated AV (Audiovisual) solutions that support diverse educational needs. The Audiovisual Systems Programmer is responsible for the programming, design, and installation for all University at Buffalo (UB) centrally supported AV systems across three campuses. They will work with critical stakeholders, project managers, consultants, contractors, and design teams to create integrated presentation, entertainment, and media production systems.

**Roles & Responsibilities Include:**

- Develops programming control solutions for complex audiovisual systems, configures and commissions DSP devices, and collaborates with network and server teams on the configuration and setup of instructional management server (Fusion) and XIO cloud applications
- Collaborate with stakeholders to understand the AV requirements for classrooms, lecture halls, conference rooms, and other educational spaces
- Program custom audiovisual solutions to meet the specific needs of each environment
- Develop and program systems to provide intuitive user interfaces for managing audio, video, and other AV equipment
- Recommends the necessary hardware, software, and networking components required for seamless integration
- Maintains version control and library of all programs ensuring systems are up to date, firmware is current, and systems are secure
- Provide ongoing programming support and maintenance for existing audio video systems across campus
- Diagnose and resolve technical issues related to AV equipment and programming
- Conduct regular system checks and programming updates to ensure optimal performance and reliability
- Maintain expertise on emerging academic technologies and their appropriate applications for learning spaces at UB. Where appropriate, recommend technologies for pilot evaluation in consultation with IT Customer Service leadership. Conduct benchmark research to identify classroom technology support issues and trends.
