Job Description

Instructional Designer I - (180059)

Description

Embry-Riddle Aeronautical University's Worldwide Campus is growing and the Instructional Design and Development Department is adding three Instructional Designers to the team. The primary responsibility of the Instructional Designer I is the successful production of high-quality online courses. There is daily interaction with internal peers, course developers, media specialists, contractors, other IDD staff, the Executive Director of Instructional Design and Development, and the Directors of Course Design and Production. The position may be responsible for the overall coordination of multiple online course development activities, serving as a program manager for online course production, updates, and maintenance. The position requires superior critical thinking, interpersonal and communication skills, along with comfort working in a team environment. The Instructional Designer I must be able to

navigate the higher education academic environment successfully.

Key job functions include:

Collaborates with remote faculty to prepare high-quality online courses, for academic and non-credit delivery.

Edits and organizes electronic information to create high-quality, adult learning oriented online course content.

Coordinates the production and/or acquisition of instructional materials, including video, graphics, animations, and interactive media elements.

In collaboration with faculty, produces instructional materials within the university's Learning Management System (Canvas).

Conducts quality assurance reviews of courses and other instructional materials.

Implements established ERAU course development standards and policies and communicates those with other team members and faculty.

Works equally well in a team-based and individual context, as required by specific work demands.

Monitors and communicates textbook issues affecting course development and implementation.

Facilitates course approval process with academic department chairs upon completion of course development.

Coordinates course review cycles and facilitates course redevelopments and updates.

Coordinates project tasks and timeline to ensure timely execution of course production projects.

If/when needed, engage with internal peers in the collaborative design and development of online courses and related projects.

Encouraged (but not required) to engage in research projects with the goal of attending relevant conferences and training as well as performing presentations.

Content Production (60%)

Perform direct course production duties, working with developers and other team members to enter content into the university's Learning Management System.

Project Management (30%)

Oversee the production and revision of courses, including schedules, deadlines, and deliverables

Quality Assurance (10%)

Facilitate quality assurance reviews of online courseware.

Qualifications

Required Qualifications:

Master's Degree in Education, Instructional Design Education Technology or closely related field. A Bachelor's degree + significant work experience within instructional design may be substituted for a Master's Degree.
