Employment Type: Regular Full-Time

Job Slot: 5892

Job Open Date: 7/10/2020

Job Close Date:

**General Summary:** This position is responsible for the coding, design, standardization, layout, and compliance of the website according to CCAC's specifications. As the role takes into consideration user experience and function, a certain level of both graphic design and UI/UX development is necessary. The role will focus on applying user centric design principles, take ownership of the website functionality, ensure proper adherence for accessibility purposes, and utilize technical abilities to adapt the website to integrate external solutions as required. This position will focus on all aspects of web architecture, including website interface design, web development, search engine optimization, and metric measurement techniques as well as responsive user interface design.

### Requirements:

1. Working closely with the marketing team to devise and maintain a web content strategy that aligns with the College's wider goals, while applying user centric design principles to the website.
2. Serve as college-wide point of contact for all incoming web projects. Take the lead role for website migration efforts and ongoing maintenance, updates, and support associated with conversion to new web management system.
3. Create, manage and optimize the consistent presentation of the college's key messages and positioning throughout the website by developing and maintaining consistent standards within the CMS system.
4. Provide support for maintenance and enhancements through use of scripting, management tools, or other applications as required. Ensure all code meets industry standards, is valid, properly structured,

and compatible with browsers, mobile devices, and common operating systems.

5. Ensure adherence in regards to accessibility on the website.
6. Ensure search engine optimization.
7. Ensure adherence to all copyright and data protection laws.
8. Implement and utilize APIs to reduce redundant work and outdated content were applicable.
9. Provide information and ongoing support for content creators, editors, and approvers.
10. Monitor key trends in Internet marketing and develop plans to implement website upgrades as appropriate.
11. Provide both weekly and monthly analytics regarding website traffic and user engagement statistics.
12. Communicate regularly with all web content providers alerting departments of new content, pages, resources and services.
13. Identify and maintain an accurate list of all individuals, and their various levels of roles/security within the college to ensure the appropriate parties can update content for their respective areas.
14. Provide proactive, ongoing communications to training personnel, who are responsible for training individuals with access to the CMS system, and incorporate assessment activities into the training to ensure quality
15. Engage with various external groups to gather and bring forward creative ideas for the website.
16. Work with content creators, editors, and approvers to ensure content remains current and relevant by providing informative, consistent reporting.
17. Study trends and analyze user access and optimize web services to accommodate user preferences.
18. Perform other related duties as assigned.

Duties: Bachelor's degree (master's degree preferred) and four (4) years of experience or an Associate's Degree and six (6) years of experience with the degree focus in web design, computer science, information technology or related field. Prefer experience in user interface design, marketing, writing and electronic media; Prefer prior experience as a webmaster or contentmanager; knowledge and understanding of successful user interfaces; competence with web authoring tools; technical ability to utilize HTML, CSS, JavaScript, PHP, Java, J2EE, JSF, REST Web Services, SOAP, JSP, Servlets, JavaBeans, HTML, HMTL5, XML, web frameworks and other relevant web design coding languages; Experience building UI from designs ,Integrating with web API's data retrieval, SQL, Angular, C#; excellent time management and project organization; understanding of development, implementation and protection of brand identity preferred.

Ability to work under pressure and adhere to tight deadlines; Ability to translate our business needs into client-friendly functions that will expand our website's influence in our industry; Ability to update and integrate various online applications, as well as developing and implementing a usability testing process to insure that new website applications meet our company's requirements.
