**Job Description**

Seeking a candidate to fill the role of Plant Utilities Engineer 3 in the Facilities Campus Operations unit at the University at Buffalo. This position will oversee Plant Utility Operations at the North Campus, South Campus & Downtown Campus and other related duties as assigned; ensuring compliance with regulations and the safety of the plant personnel.

**Key Responsibilities Include:**

- \* Demonstrate exemplary customer service acumen and a full understanding of departmental needs relative to the services we provide. Regularly interface with FPMO's and other department heads; seeking feedback as a measure of performance. Be a role model for other Supervisors and employees in all areas of conduct. Be able to effectively and tactfully communicate in person, by phone and in writing.
- \* Coordinate and deliver employee training in areas of Health & Safety and on plant procedures from

their first day by utilizing and/or improving existing departmental training materials and manuals; or to develop manuals where needed. Continuously modify or revise training manuals to capture changes in procedures or equipment. It is imperative that training is planned out in advance and documented.

\* Ensure continuity of plant operations at North, South, & Downtown campus through pro-active planning and engagement in these operations. Regular visits to each location to coordinate with plant supervision and plant operators is required. Monitor and get ahead of operational issues that require planning and capital funding to execute; with intent to avoid any service interruptions. Work with plant Supervision to ensure staffing while minimizing overtime. Assume responsibility for plant operations in-person when Supervisors take vacations; at all three campuses.

\* Assist and/or coordinate and run larger repairs and small projects such that the Supervisors can focus on daily tasks, repairs, and employee issues. Knowledge of procurement and purchasing processes is helpful. Coordinate with multiple internal and external entities such as EH&S, D&C, Planning, contractors, outside utility providers and Skilled Trades.

The successful candidate will have in-depth working knowledge of building systems and equipment including steam plant operation, chilled water plant operation, and building controls systems to effectively engage with Supervisors to troubleshoot complex system problems causing chronic and/or repeat customer service issues.
