What You'll Do

Under close supervision of Principal Investigator, the Research Technician will conduct a variety of bench research experiments following established procedures and protocols predominantly using cell and tissue culture, characterization of therapeutic peptides' efficacy on cell behavior. Additional responsibilities include:

- Perform additional experiments using techniques such as tissue culture, immunohistochemistry, electrophoresis, protein purification, immunofluorescence and Western blotting
- Records results and maintains accurate records of experiments
- Interpretats data and assists with basic statistics and analysis
- Maintains laboratory equipment and orders/keeps inventory of supplies
- Prepares stock solutions, reagents and other media

What We're Looking For

Basic Requirements:

- Knowledge and skills typically acquired by a Bachelor's degree in science with up to one year laboratory experience
- Possess a strong basic lab foundation

Preferred Qualifications:

- Familiarity with laboratory techniques and procedures as identified above
