What You'll Do

The Central Sterile Technician's work supports an integrated clinical care team that provides high quality medicine and nursing care to our patients.

Responsibilities include:

- Retrieve, decontaminate, clean, inspect, assemble, pack, sterilize, and distribute instruments and packs used for patient care throughout the hospital. Make sure all packs are complete and instruments are in proper working order.
- Perform computerized scanning and tracking of the SAH SX implant inventory.
- Process laundry (surgery towels, drapes) for the ORs and Large Animal Hospital.
- Acts in accordance to established procedures to maintain knowledge competence to ensure uninterrupted supply of equipment, instruments and supplies to support supply chain.
- Orders supplies from designated vendors
- Maintains inventory of all supplies

The schedule for this position is a flexible Monday through Friday position. Part-time (3 days) will be considered.

What We're Looking For

Basic Requirements:

- High School graduate or the equivalent with minimum one-year related work experience in the veterinary technology or medical field.
- Basic computer skills; WORD, Excel.
- Ability to prioritize responsibilities and handle multiple tasks simultaneously.
- Ability to work independently or as part of a team
- Willing to train a new graduate of Central Processing Certification Program.
- Knowledge of how to properly clean/decontaminate basic medical and surgical instruments and equipment.
- Knowledge of sterile processing equipment; ultrasonic cleaner, autoclave, Steris VHP sterilizer.
- Basic knowledge of surgical instruments.
- Knowledge of electronic medical systems preferred
