1. All types of coolers, refrigerators, freezers, air conditioning units and systems
 2. Humidifiers
 3. Compressors
 4. Ventilators
 5. Cooling towers and other similar and related equipment
- Diagnose, troubleshoot and service the HVAC building automation systems (BAS) and electrical/mechanical equipment of all types found on campus. These are mechanical, electrical and computerized equipment used to perform HVAC energy management and climate control.
 - Use computer to document service work performed.
 - Operate computers used in the field of direct digital controls (D.D.C.).
 - Perform the removal or installation of electrical/mechanical HVAC building control equipment and systems.
 - Involved in all facets of small mechanical HVAC equipment and building control system (BCS) projects.
 - Provide high level of customer service.
 - Expected to perform emergency service promptly when-notified.
 - Read and understand prints and schematics.
 - Work with and direct outside contractors when necessary.

In some cases the Service & Repair Mechanic (HVAC-R) will be responsible for directing a Maintenance Assistant who will assist in the field tasks.

The candidate must detail their qualifications and submit appropriate documentation with their application to clearly explain and demonstrates their skills and competency for this position
