Job Description	

Overview

The Department of Neuroscience is a basic science department that focuses on cutting-edge research in the areas of stress, GABAergic inhibition, depression, and epilepsy. Dr. Jamie Maguire is supported by funding from the federal government and industry. The faculty within the department is also extensively involved with the Biomedical Graduate Science Program in Neuroscience as well as teaching within the medical school.

What You'll Do

Under close supervision of the Principal Investigator, the individual will conduct a variety of routine experiments following established procedures and protocols. The primary functions of this position include: 1) Genotyping and managing a mouse colony, 2) Preparation of solutions and reagents, 3) general laboratory management, and 4) assisting with experimental
