Job Description	

Position Summary

The Office of **Business Reporting and Systems** within Business Services is seeking a **Business Intelligence (BI) Analyst** who will be responsible for strategically designing the framework to organize the information management and technology components used to build Business Intelligence systems that meet the data access needs of the organization. In this role you will be responsible for:

- Developing an environment that allows business users to identify business issues, formulate business questions, determine what information is needed, determine where to find the information, retrieve, analyze, report and take action.
- Support the Business Intelligence application (Oracle Business Intelligence (OBI)
