**Job Description**

The [School of Dental Medicine](#) at the University at Buffalo is seeking applications for a **Clinical Software Trainer**. The clinical software trainer is responsible for preparing, conducting, and evaluating training programs for clinical software, primarily the electronic health record (EHR). Coordinates training with subject matter experts as needed. Writes, updates, and maintains training materials to be used in training programs and as job-specific aids.

Job responsibilities include:

- Prepare and conduct electronic health record training programs for all faculty, staff, students, and residents.
- Determine course content according to clinical and academic objectives.
- Create instructor materials (course outlines, background material, instructional materials, and training aids) for training courses.

- Execute training sessions, webinars, workshops etc. in groups or individually.
- Produce training schedules, written/video training aids, and classroom agendas.
- Creation of reports in the electronic health records.
- Keep and report data on completed courses, absences, issues etc.
- Evaluate results of training programs, assess training needs, and make recommendations.
- Ensure the quality and consistency of training programs and materials.
- Participate in committee meetings for design and planning of clinical software changes.
- Test and provide feedback on clinical software changes.
- Work with the Clinical Software Support Specialist(s) to identify and resolve training issues.
- Assist with the creation and running of reports within the EHR.
- Assist the Clinical Software Support Specialist(s) when required, acting as both an escalation path for them as well as a backup in case of absence or high workload.
- Work with IT and electronic health record admin Team to ensure changes being made are communicated and training material is reflective of the current system and configuration.
- Performs other tasks assigned by clinical operational leadership as needed.
