Job Description

The [Department of Pediatrics](#) at the University at Buffalo is seeking a highly motivated **Research Technician II** to join Dr. Mark Hicar's research team. This individual will play a crucial role in supporting various research projects within the Division of Pediatric Infectious Diseases. The successful candidate will possess strong organizational skills, attention to detail, and a solid background in molecular biology. Experience in data analysis and programming would be advantageous. This position offers an excellent opportunity for post-bachelor's experience or as a continuation of a research career.

Responsibilities include:

- Conduct laboratory experiments according to established protocols.
- Prepare reagents, solutions, and culture media.
- Perform sample processing and antibody or phage isolation techniques.

- Conduct assays such as plaque assays and ELISA assays.
- Phage library screening with monoclonal antibodies and plasma.
- Isolate RNA and perform rt-PCR.
- Manage sample requests and ordering from various systems.
- Ship samples to companies and collaborators.
- Assist with data analysis and interpretation.
- Maintain accurate records of experimental procedures and results.
- Ensure compliance with laboratory safety protocols.

Funding for this position is assured for three years.
