Job Description

Join a dynamic research environment working at the leading edge of drug metabolism. The [Estrada lab](#) in the [Department of Biochemistry](#) is interested in hiring a **research support specialist** who will have the opportunity to lead their own independent project, earn first authorship on published research articles, and present their original research at conferences. Our lab uses a variety of biophysical and biochemical techniques to investigate the structure and function of cytochrome P450 enzymes. As a lab member, you will receive one-on-one training in these and other necessary techniques.

This position includes the following key duties:

- Growth of bacteria and purification of proteins of interest.
- Protein quantification and characterization.
- Data analysis and interpretation of data.
- Communication of research findings in laboratory notebooks, written reports, and in oral

presentations.

- Maintenance of common laboratory stocks and reagents.

A typical day in the lab may include an individual meeting with Dr. Estrada, followed by research in the laboratory, a flexible lunch, and maintenance of a laboratory notebook. You will also be able to experience the dynamic work environment at the Jacobs School of Medicine and Biomedical Sciences which is housed in a state-of-the-art building in downtown Buffalo, NY. We encourage applications from candidates of all backgrounds. The Estrada lab believes that a diverse and inclusive workforce is essential for achieving the lab's research goals.

Additional Information:

1. Learn about our [benefits](#), where we prioritize your well-being and success to enhance every aspect of your life.
2. Learn more about what it looks like to be a part of the [University at Buffalo community](#).
