Job Description

The University at Buffalo's [Department of Pediatrics](#) is looking for an experienced **Research Coordinator** to oversee several critical research projects within the Neonatal Intensive Care Unit (NICU). You'll be working closely with the Principal Investigator, Dr. Anne Marie Reynolds, and a team of researchers to ensure that all trials are compliant, well-organized, and on track. If you thrive in a clinical setting and have a passion for research in neonatal care, this role is perfect for you.

Key Responsibilities:

- Coordinate and manage clinical research studies, ensuring all documentation is properly maintained.
- Acquire a thorough understanding of study protocols and accurately complete all related activities.
- Collaborate closely with the PI and research assistants.
- Recruit and enroll participants at school-based health centers in Buffalo, and collect necessary

study data.

- Ensure informed consent processes are followed, including discussing treatment options and ensuring forms are properly understood and signed.
- Perform spirometry testing after completing required training.
- Conduct home visits for enrollment if needed.
- Provide education on asthma management to students and parents.
- Manage study timelines, including scheduling follow-up surveys and other activities.
- Monitor participant safety throughout the study.
- Maintain adherence to recruitment goals and quality standards.
- Serve as the primary contact for study participants and their guardians.
- Input data into the RedCap system and extract relevant information from medical records.
- Monitor compliance with protocols and record any deviations.
- Assist with RedCap programming as needed.
- File required reports and submit amendments to the Institutional Review Board (IRB).
- Review adverse events and submit severe adverse event documentation.
- Perform additional tasks as required.
