personnel, including data custodians, the Office of Institutional Analytics, and internal SOM staff, to ensure seamless collaboration and effective data modeling and related reporting.

### **Responsibilities include, but may not be limited to:**

- Collaborate with various stakeholders to understand and translate their needs into compelling stories through the use of University tools and systems.
- Project management approach to include preparing and maintaining a project charter, project plan, status reports, etc.
- Develop and present visualizations to address critical business questions and key performance metrics for non-technical audience.
- Create interactive dashboards with features like filtering and drill-down to enable insightful data exploration.
- Ensure data accuracy and integrity in all visualizations and analyses.
- Understanding of SQL programming language and query development.
- Knowledge of data management concepts, tools, issues, and environments such as relational databases, application development, data/statistical analysis, and model development.
- Manage inventory of databases, datasets, and other data sources related to faculty research needs.

### **Learn more:**

- Our [benefits](#), where we prioritize your well-being and success to enhance every aspect of your life.
- Being a part of the [University at Buffalo community](#).
