**Job Description**

The University at Buffalo, [Jacobs School of Medicine and Biomedical Sciences](#) is seeking a **Research Technician I** to perform routine tasks to support and directly assist a research project or program. The experiments performed in the lab will be designed to understand the mechanisms by which pathogenic strains of *Klebsiella pneumoniae* or *Acinetobacter baumannii* cause disease. Studies will be performed to identify and assess potential drug targets and/or vaccine candidates.

- Perform experiments and record and interpret results
- Use techniques including, but not limited to growth and maintenance of bacterial strains, determining bacterial titers, animal work model, ELISA assays, protein carbohydrate purification, and molecular technique for creating mutants
- Perform lab maintenance duties, including media preparation and ordering of supplies and equipment
