The Network Engineer III supports the satisfactory operation of the WPI network while moving towards Infrastructure as Code using industry automation frameworks and in-house tooling. This is a senior level position where a broad knowledge of network technologies and vendors is expected.

Compensation ranges from \$95,000 to \$110,000 annually, depending on experience, and includes excellent benefits: 5 weeks of paid time off, 13 holidays, comprehensive health, dental, and vision coverage, a 9.5% retirement match after 12-months, disability and life insurance, tuition assistance (including full WPI tuition for dependents after 3 years), free access to the fitness center, wellness resources, flexible summer hours, employee discounts, and ERG participation.

### **JOB DESCRIPTION**

Perform network engineering support including, but not limited to:

- Provide escalation support and guidance to others Network Engineers in troubleshooting issues and engineering deployments
- Maintain and support network hardware including switches, routers, wireless access points, and other communications hardware
- Assist with maintenance of out-of-band management hardware and battery backup systems
- Support physical plant additions and renovations as they relate to the fiber optic, voice, and data infrastructure
- Provide 24/7 connectivity for users of the data network including adds/moves/changes and wireless connectivity

Provide and maintain essential networking support services (DNS, DHCP, IPAM, NAC, etc) to the campus by:

- Administer Linux and FreeBSD appliance platforms which provide critical DDI, RADIUS and Policy Management services
- Maintain and support self-service end-user network provisioning services
- Evaluate emergent technologies and code maintenance releases for all Networking Support Services
- Plan and Develop end-users self-service tools for Network Registration and Wireless Guest Pass using various industry standard programming languages
- Coordinate with Systems Operations and ARC/Linux Operations as needed

Manage internal tools and services for network services including:

- Administer and extend internal asset, shipping and receiving tools for tracking purchases and cable inventory levels
- Maintain Network Operations Center digital displays for graphs, visualization of alerting and support ticket visibility
- Compose ad-hoc scripts, integrations and reports to support various initiatives as needed
- Maintain a working knowledge of virtualization and cloud technologies to support various projects and systems

Assist with architecture changes and evolution by:

- Research and analyze new technologies and how they will impact Network Support Services
- Participate in Internal Network Design Review sessions with the Directors of Network Services and Network Architect
- Develop and Deploy proof-of-concept integrations to better support Network Architecture changes
- Contribute feedback in the planning of the Network Services Roadmap
- Compose and Prepare network documentation standards and reports with the Director of Network Architect

Manage the monitoring platform which pages/alerts ITS staff of problems prior to user impact including:

- Administer all servers and services which comprise the Monitoring Platform
- Coordinate monitoring needs of the various ITS Departments into a well understood series of tools
- Provide integrations between various systems to enhance the ITS Monitoring platform using programming languages such as PHP, Python, Perl, and others
- Additional duties may be required as circumstances and events dictate.

Requirements:

- Bachelor's degree in relevant field.
- 5 years' experience in advance knowledge of IT networking.

### **FLSA STATUS**

United States of America (Exempt)
