Position Summary

The [Facilities Department](#) at the University at Buffalo invites applicants for our **Trades Specialist Carpenter** position. The incumbent must possess a knowledge of carpentry equipment and systems. Candidate must demonstrate proficiency in the safe use of hand and power tools.

Incumbent will be responsible for completing the tasks listed below at a journey-level competency as a Carpenter in Facilities Campus Operations:

- Install structures and fixtures, such as windows, molding, ceilings and office furniture.
- Follow blueprints and building plans to meet the needs of customers.
- Planning, layout, installing and constructing building frameworks, including walls, floors and door frames.
- Measure, cut, and shape wood, plastic, and other materials.
- Properly using equipment, material and tools in a safe and professional manner.
- Being proficient in the application of building codes.

Additional Information:

1. Learn about our [benefits](#), where we prioritize your well-being and success to enhance every aspect of your life.
2. Learn more about what it looks like to be a part of the [University at Buffalo community](#).

University at Buffalo is an affirmative action/equal opportunity employer and, in keeping with our commitment, welcomes all to apply including veterans and individuals with disabilities.

Minimum Qualifications

Four years of full-time experience in carpentry work under a skilled trades person which could provide training equivalent to that given in a training, apprenticeship, or equivalent program, or an equivalent combination of experience and training gained by completion of technical courses in carpentry at a school, institute, or branch of Armed services; OR successful completion of a NYS two-year Carpenter Traineeship or NYS two-year carpenter training program; OR successful completion of any equivalent carpenter two-year training or apprenticeship program;* OR four (4) years of full-time experience in carpentry.

* Successful completion of the traineeship and the training program included a total of 288 hours of trade specific classroom instruction, 45 hours of technical math course work, 45 hours of technical
