## **Position Summary**

We are looking for highly motivated, enthusiastic individual dedicated to excellence to join our team as a **Research Technician II** to support work on corneal diseases. Dr. Sangita Patels lab, <a href="Department of Ophthalmology">Department of Ophthalmology</a>, at the University of Buffalo, is located at the Buffalo VA Medical Center. The cornea is the primary lens of the eye, and its clarity is crucial for good vision. Dr. Patels lab studies the physiology of the corneal endothelium, the cell layer that maintains transparency of the cornea. There is an opportunity for growth as we will train the passionate candidate in the required skills.

**Key accountabilities and responsibilities** - The successful candidate will support ongoing and new research activities in the lab including:

- Human and cow eye dissections
- Preparing and maintaining cell cultures
- Performing various bench laboratory protocols/experiments
- Recording and analyzing results
- Maintaining electronic databases and documents
- General laboratory maintenance/upkeep activities
- Assisting trainees in the laboratory

#### Learn more:

- Our <u>benefits</u>, where we prioritize your well-being and success to enhance every aspect of your life.
- Being a part of the <u>University at Buffalo community</u>.

As an Equal Opportunity / Affirmative Action employer, the Research Foundation will not discriminate in its employment practices due to an applicants race, color, religion, sex, sexual orientation, gender identity, national origin and veteran or disability status.

#### Minimum Qualifications

- Associates degree or two years formal training in subject matter directly related to the project or program
- 3 years of experience directly related to the project or program. Requires familiarity with the standards used in the field.
- The education and experience requirements described in this standard may be satisfied by an
