Position Summary

The Paz Lab within the Jacobs School of Medicine and Biological Sciences [Department of Structural Biology](#) seeks a **Research Technician I**. The successful candidate will join our team studying medically relevant transport proteins.

We are looking for a motivated applicant who focuses on the smallest details while still keeps the big picture in mind. The technician will be performing experiments related to membrane protein such as bacterial and cell culture, protein purification, biochemical characterization, as well as support general lab operation.

Learn more:

- Our [benefits](#), where we prioritize your well-being and success to enhance every aspect of your life.
- Being a part of the [University at Buffalo community](#).

As an Equal Opportunity / Affirmative Action employer, the Research Foundation will not discriminate in its employment practices due to an applicants race, color, religion, sex, sexual orientation, gender identity, national origin and veteran or disability status.

Minimum Qualifications

- The candidate must hold a college degree in biochemistry or a related discipline.
- At least 1-year of lab experience.

Preferred Qualifications

- Experience with cell culture.
- Prior chromatography knowledge.
