Downloaded On: Oct. 30, 2025 1:41pm
Posted Oct. 29, 2025, set to expire Jun. 30, 2026

The Robotics Engineering (RBE) Lab Manager is responsible for all aspects of robotics engineering undergraduate and graduate labs and project space organization, preparation and configuration. In conjunction with the assigned student Lab Assistant staff, this individual works to ensure that necessary materials, setups and work areas are properly acquired, configured, and maintained to facilitate timely and efficient course and lab work by students.

This position must take pro-active steps to gain a clear understanding of robotics course requirements and flow, be able to work effectively with faculty and apply management skills to guide and mentor student lab assistants. In addition, the candidate must guide trouble-shooting and problem-solving activities as needed to ensure that the environment, setups and materials are functional and well-suited to the needs of the courses and projects. Further, the candidate will take steps to ensure lab safety, coordinating with the WPI's Office of Environmental Health and Safety (EHS).

JOB DESCRIPTION

Responsibilities:

- Maintain RBE labs and workspaces to ensure a safe and orderly environment, keep the various
 equipment and devices in good operating condition. Develop and maintain protocols for integrity
 and cleanliness of the spaces. Comply with EHS guidelines. Manage student Lab Assistant staff,
 provide assignments, mentorship, and oversee activities.
- Review and develop hardware and software used in courses, using appropriate tools and
 materials. This includes items such as robots, arms and other devices that are provided to
 students for use in the courses. Utilize student talent where feasible to support this activity.
- Assist faculty in materials procurement and preparation, including demo arenas, kit generation
 and oversight. Purchase lab supplies while maintaining awareness of budget constraints, seeking
 cost-conscious solutions and spending only where necessary.
- Update teaching labs' hardware and software. Help faculty members with new solutions and make new prototypes when needed.
- Keep track of all materials, ensure timely delivery of suitable items. This includes creating and maintaining a clear tracking methodology of inventory control. Manage RBE storage facilities, preserving various materials and supplies for future use by project teams and others.
- Assist in the development of new or refurbished lab spaces to establish suitable working environments consistent with the needs of RBE.
- Communicate and collaborate effectively with all stakeholders and lab users.

Requirements:

- Bachelor's degree in related field.
- 5-10 years of relevant experience.
- 5-8 years of experience in the design and fabrication of robots, electromechanical systems, mechatronic systems or similar.
- 5-8 years of experience in software development related to robotics and embedded systems. Linux experience required.
- 2-10 years of experience in inventory management and procurement.

Compensation: \$62,500 - \$78,100 per year

Salary is based on related experience, expertise, and internal equity; generally, new hires can expect pay between the minimum and midpoint of the range. Compensation at WPI
