Posting Detail Information

Position Summary

The **Research Support Specialist** is responsible for day-to-day operations for optimization crystallization services in the National Crystallization Center (NCC), as well as assisting with the high-throughput operations. The NCC is a research facility serving the structural biology community, that focuses on advancing crystallization science and providing researchers access to state-of-the-art experimental methods for generating macromolecular crystals for structure determination. As a member of the National Crystallization Center team, the candidate will work in a dynamic, inclusive, and collaborative environment, with opportunities to take initiative and expand your skillset in structural biology.
