- Generate IRB approved materials for distribution to study subjects to promote project enrollment and retention of enrolled subjects.
- Oversee implementation of research studies, generation of qualitative and quantitative data and data collection forms and surveys.
- Manage the day-to-day operations of the assigned project including development and implementation of research procedures and systems.
- Assist Principal Investigator with administration of clinical trial protocols, including obtaining informed consents and screening subjects, maintaining research records and research subject records, managing correspondence, researching medical records, recording data, and attending training sessions.
- Collect, process, store, and ship biological samples per study protocol.
- Conduct biological and laboratory assays as per prespecified operating instructions.
- Assist PI in development of new research assays and tests.
- Maintain and manage laboratory supplies, kits, and reagents.
- Maintain, analyze, and present any study related data.
