The role of the Division of Animal Resources (DAR) is to facilitate research and teaching with animals at the Cummings School of Veterinary Medicine. The Tufts Farm, RBL animal care, and Laboratory Animal Medicine Service (LAMS) are integral units of the DAR. We maintain teaching and production herds of many common agricultural species including dairy heifers, beef cattle, horses, small ruminants, poultry as well as several other lab animal species. The role of the Laboratory Animal Medicine Service is to facilitate research and teaching with animals at the Cummings School of Veterinary Medicine. To do this, LAMS develops and implements a high-quality program of animal care and use to enable the teaching and research activities of the school. This program is characterized by a high level of client service, strong veterinary expertise, effective technical service delivery, quality animal housing and care, compliance with federal and state regulations and maintenance of AAALAC accreditation.

What You'll Do

The Department Laboratory Animal Medicine Service (LAMS) is looking for a Lab Animal Technician to join our team. This position will involve a variety laboratory and animal model-related tasks under the supervision of the principal investigators. With a high degree of autonomy, judgement, and skill, provide excellent husbandry, and care for a wide variety of laboratories and teaching animals. Specific animal duties include receipt and transport, provision of food and water, changing and cleaning of cages, monitoring health and welfare, documentation of census and animal health records, handling and restraint, sanitation of caging and rooms. Operation of various equipment and transport vehicles. Train and assess competency of new hires. Provide technical support for experimental procedures. The candidate must be committed to the humane handling and care of animals used in research and be able to provide services to a variety of research investigators. This position will require working in a BSL-2 environment, BSL-3 environment, select agent environment and farm environment. This position is considered essential, and as such requires weekend, holiday and off hour's coverage as needed.

As a Lab Animal Technician you will:

- Perform animal Care and husbandry (wide variety of lab animal species)
 - clean, feed and water animals daily.
 - receive, properly identify, transport, handle and restrain animals by appropriate techniques.
 - Observe and report animal problems immediately to veterinary care staff.
 - These observations include but are not limited to sick animals, maintenance problems, safety hazards, and reporting animal welfare concerns.
 - Follow SOPs, regulations, and guidelines to promote animal health and welfare.
- Sanitize animal rooms, caging, animal use equipment and support areas with approved chemical agents by appropriate techniques.
- Collection and dispose of waste and hazardous items by executing established procedures. operate equipment such as cage and rack washers, autoclaves, foggers, and vehicles for animal transport.
- Keep work areas stocked with supplies needed for routine operation of the area
- Operate heavy equipment such as forklift, bobcat and hoist.
- Follow health and safety policies by complying with established procedures and regulations to promote personnel safety.
- Maintain facility security to ensure animal and personnel safety
- Document and maintain daily animal census and animal health records with accuracy.

- Record accurate documentation necessary for regulatory compliance.
- Monitor environmental parameters daily through proper documentation and report any deviations immediately to the supervisor.
- Ensure compliance with all Tufts University policies and local, state and federal laws governing the use of research animals.
- Follow established disease control protocols to daily clean, disinfect, and maintain shelter offices, cages, and general areas.
- Understand and respect confidentiality and be able to handle difficult and sensitive situations with tact
- Administer medications.
- Assist Veterinarians and Investigators in procedures performed on laboratory and farm animals (ex. treatments, surgical assistance, pre- and post-operative care)
- Use of computer for e-mail access and data entry

Farm animal husbandry and care (chickens, sheep, bovine, horses, etc):

- Cleaning, feeding, and watering of all farm animals on a daily basis.
- Specialized tasks include but are not limited to operation of farm machinery, artificial insemination of cattle and swine, and nursing care of sick animals under veterinary supervision.

All farm employees are cross trained and able to fill in for their colleagues when needed.

What We're Looking For

Basic Requirements:

- 3+ years of prior experience with animals either in a research or veterinary setting.
- High School Diploma or equivalent.
- A valid driver's license is required and must be maintained for the duration of employment.
- Should be comfortable using Microsoft Windows programs including Word, Excel, Powerpoint; Sirius, the e-mail network and internet.
- Position involves working with a variety of species; heavy lifting; frequent pushing and pulling of heavy equipment; standing for long periods; and use of autoclaves, cage washers, hoists; operating motor vehicles and forklift or bobcat.
- Employment may be contingent upon successfully obtaining and maintaining FBI security clearance for entry to select agent facilities (Bioterrorism Security Risk Assessment procedures). Ability to lift up to 50 lbs. with or without accommodation.

Preferred Qualifications:

- Related Associates Degree, vocational training or AALAS certification preferred.
