**Job Description**

**UB Facilities Operations** has an exciting opportunity for a HVAC BAS Engineer. This position will provide technical oversight of the campus building automation system (BAS).

**Key Responsibilities include:**

Programming (the University will provide BAS program training for this position): Function as the departments lead programmer for the Siemens and Schneider Electric BAS by:

- Supporting the HVAC control staff in troubleshooting BAS problems
- Monitoring control systems and sequences
- Implement corrective actions
- Establish or modify operational schedules and control sequences while maximizing energy efficiency

- Review, correct, clean-up, and optimize programming as needed
- Energy Management: Through the BAS, reduce energy consumption and improve energy efficiency in order to lower energy costs and reduce the building's environmental impact.
  - Track how much energy is being used in the building and identify areas where energy is being wasted.
  - Projects: Manage planning, scheduling, purchase orders, contractors and execution of small projects related to the BAS.
- Design support:
  - Perform field review of existing conditions, building plans, and manuals
  - Meet with the design engineers and control system contractors during construction or renovation, or new construction planning
  - Provide subject matter expertise and engage in technical level meetings and discussions with the other units on campus and engineering staff
- Monitor fitness and life-cycle of BAS controllers and equipment
- Identify inefficient operation of various HVAC systems
- Coordinate and schedule BAS controller and system upgrades with UB-IT and users
- This position may require the management of the daily responsibilities of an Energy Systems Manager 1
